Whatsapp Messenger: 03188560400 |

Address: Raza Excellency Apartments, Block 7, Gulistan-e-Johar, Karachi, Sindh, Karachi, Pakistan (Work)

● ABOUT ME

I'm **Aizaz**, a Software Engineering student at **COMSATS University Islamabad, Lahore Campus**, passionate about building practical software and continuously expanding my technical skills.

After developing a strong foundation in **C++** through Programming Fundamentals, I am now advancing with **Java** to deepen my understanding of **Object-Oriented Programming (OOP)**, **Data Structures & Algorithms**, and core **Software Engineering** principles.

I enjoy combining creativity with technology to build solutions that address real-world problems. My interests include software development, automation, and intelligent systems, and I'm always eager to learn modern tools and technologies that improve the way software is designed and delivered.

I believe in learning by building. Whether it's developing applications, experimenting with new technologies, or contributing to hands-on projects, I'm focused on writing clean, maintainable code while continuously growing as a software engineer.

● EDUCATION AND TRAINING

CURRENT Lahore, Pakistan

UNDER-GRADUATION COMSATS University Islamabad, Lahore Campus

Website <https://lahore.comsats.edu.pk/> | **Field of study** Software and applications development and analysis |

Level in EQF EQF level 6

● SKILLS

HTML | C++ | Python | JavaScript | Public Speaking | DSA | C | CSS | Git | Linux | DBMS | Github | Java | Object-Oriented Programming | Bootstrap | React

● PROJECTS

Console Based Snake Game C++

This is my 1st semester project in collaboration with my Classmates. It marks the beginning of my real journey into C++, where I learned how persistence turns confusion into clarity.

Features:

Console-based UI with colored snake, food, and borders

Smooth wrap-around movement

Start menu, pause, and improved game-over flow

Safe growth logic + win condition at max length

Dynamic speed adjustment and scoring system

Link <https://github.com/Aizaz-Noor/console-snake-cpp>

Hostel Kharcha Manager

A C++ terminal application for tracking shared expenses in a hostel. Six roommates, one electricity bill, zero arguments about who paid that's what this solves.

Built as a 3rd semester Data Structures project. Every data structure is written from scratch. No STL containers, no external libraries.

Link <https://github.com/Aizaz-Noor/Hostel-Kharcha-Manager>

LifeFlow, a blood bank management system tailored for hospitals in Pakistan.

LifeFlow includes an automated alert system, a registry for Thalassemia patients, and tracking for TTI (Transfusion-Transmissible Infections) screening, public page for donor recruitment and a secured dashboard for hospital staff to manage inventory, blood camps, and requests.

Link <https://github.com/Aizaz-Noor/LifeFlow-BloodBank-Frontend>

Weekly Habit Tracker

A single-page habit tracker. Add daily habits, check them off on a weekly grid, watch streaks build over time. No account, no server data lives in your browser.

Link <https://github.com/Aizaz-Noor/habit-tracker>

ANK-CINEMA

A cross-platform terminal media downloader engineered for speed and reliability. Built parallel multi-source search using ThreadPoolExecutor, deduplication by info-hash, and magnet enrichment across 16 trackers. Features self-healing DNS on Linux and a remote auto-updater that preserves system Python environments.

Link <https://github.com/Aizaz-Noor/ANK-CINEMA>

CURRENT

Agent-Startup-Skills

An AI orchestrator that transforms Claude Code or Antigravity into a team of 8 specialist personas. They build SaaS products end-to-end, passing through a mandatory human approval gate between every single phase including a strict OWASP security-audit step.

Link <https://github.com/Aizaz-Noor#agent-startup-skills>

Flappy bird Clone(with Special Effects)

A Java-based Flappy Bird game using JavaFX with smooth gameplay and particle effects

Link <https://github.com/Aizaz-Noor/FlappyBird>

● CERTIFICATIONS

Pakistan Freelancers Assosiation (PAFLA)

Google Soft Skills Program

I've completed the Google Soft Skills Program! From mastering communication and teamwork to leadership and problem-solving, this journey has been transformative.

Mode of learning: Online

MLSA FAST Peshawar

Web Nexus: Front End Edition program

Comprehensive training in modern frontend technologies including HTML, CSS, JavaScript, and React.

Mode of learning: Online

MLSA CUI Lahore

MLSA Appreciation

It's been an incredible experience contributing, collaborating, and learning with an amazing community.

Mode of learning: Presential

ACM CUI Lahore

ACM Appreciation

being a part of 404 Squad and Event Emperor's its an amazing journey to build a Network, having a great learning experiences with ACM Lahore.

Mode of learning: Work based

● **CREATIVE WORKS**

Video Editor

Edited farewell videos, school event footage, and promotional projects, combining technical editing and creative storytelling.

Produced and edited videos for school events and creative storytelling using Kinemaster and CapCut, focusing on transitions, sound, and narrative flow.
